

An Nguyen

27thang06.anna@gmail.com | github.com/khanhan-nguyen | 917-487-0314 | New York, NY

EDUCATION

Fordham University, Bachelor of Science in Computer Science

Expected Graduation: May 2028

- **GPA:** 3.97/4.0
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Discrete Structures
- **Honors:** Faber Award, Woolworth Award

WORK EXPERIENCE

FPT Software

AI Engineer Intern

Vietnam, June 2026 – August 2026

- Developed a **Python-based preprocessing pipeline** with **Pandas** and **Scikit-learn** to automate raw-data transformation into model-ready inputs, improving processing throughput by **30%**.
- Implemented a reusable **3-stage preprocessing workflow** for missing-value imputation, categorical encoding, and feature scaling to standardize model-training inputs.
- Evaluated regression models using **MAE, MSE, and R^2** to compare model performance and guide tuning decisions.
- Reduced housing-price prediction error by **15%**, achieving an **R^2 of 0.66** with a tuned linear regression model.

Innovator Hub Asia

Software Engineer Intern

Singapore, June 2025 – August 2025

- Developed **10+ reusable web components** and responsive interfaces using **JavaScript, HTML5, and CSS3** across 3 client-facing portals.
- Integrated **REST APIs** to retrieve and render real-time application data, enabling dynamic content updates and previews with **under 500ms response times**.
- Automated parsing and cleaning of **15+ client datasets** using **Python scripts**, reducing manual processing time by **40%**.
- Collaborated with engineers to **diagnose application bugs, validate fixes**, and test API and interface behavior before deployment during iterative development cycles.

PROJECTS

Portfolio Website | khanhan-nguyen.github.io (a personal website built with HTML, CSS, Bootstrap, and JavaScript)

Task Management | *React.js, Vite, JavaScript, CSS, Web Storage API*

[GitHub](#)

- Built a responsive React SPA supporting **4 CRUD operations** (create, read, update, delete), status filtering, and persistent state using the Web Storage API.
- Managed dynamic application state using **React Hooks** (useState, useEffect) and immutable array operations (map, filter) to synchronize task updates throughout the application.
- Developed a mobile-responsive interface with **CSS Custom Properties** and **Flexbox** for consistency across screen sizes.

Background Remover | *HTML, JavaScript, CSS, REST API*

[GitHub](#)

- Integrated the **Remove.bg REST API** into a responsive web application for automated background removal and real-time before-and-after previews.
- Implemented **2 image-upload workflows** (drag-and-drop and file selection) with local previews and client-side validation using FileReader and Drag-and-Drop APIs.
- Optimized the interface for **3 different screen layouts** (mobile, tablet, and desktop) using **CSS Grid, Flexbox**, and mobile-first media queries.

Movie Trends Data Analyzer | *Python, Pandas, Matplotlib*

[GitHub](#)

- Conducted Exploratory Data Analysis on a Kaggle dataset of **10,000+ movie records** to uncover revenue trends, popular genres, and audience rating patterns spanning 20 years.
- Cleaned raw data with Pandas, resolving **500+ missing values** and eliminating duplicates to ensure accuracy.
- Visualized box-office and audience trends through **7+ Matplotlib charts**, including bar charts and scatter plots.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C++, C, SQL – **Libraries:** Scikit-learn, Pandas, NumPy, Matplotlib

Databases & Tools: MySQL, SQLite, GitHub, Linux, Visual Studio Code – **Frameworks:** React.js, Node.js, Bootstrap

Languages: Vietnamese (*Native*), English – **Interests:** Travel, Photography, Beauty & Fashion, Movies, Matcha
